

The quality of life evaluation for patients who are receiving treatment for metastatic castration resistance prostate cancer.

- Are you 18 years old?
- Are you NZ permanent resident/ Citizen
- Are you diagnosed with Prostate cancer and currently have end staged metastasised stage?
- Receiving therapy for metastatic prostate cancer

If so, you are invited to participate in a research project.

Why this study?

Quality of life in end-stage metastatic prostate cancer (mCRPC) is directly affected due to the various treatment options. This study will analyse the quality of life of patients receiving treatment for metastatic castration resistance prostate cancer

What is involved?

Answering survey questionnaires to gather information about experience with ongoing treatment.

Who am I?

My name is Madhusudan Vyas; and I am currently doing my Doctorate of Health Sciences (DHSc) from AUT, Auckland. I am also a Medical Radiation Technologist specialising in Nuclear Medicine and working with Mercy Radiology, Auckland. I am also working as a lecturer for the undergraduate Medical Imaging programme (BHSc MI) at Unitec Institute of Technology, Auckland since 2017.

All the information collected will be stored securely and will only be used for this study.
